After graduating from St. John's University with a degree in Public Relations, I became a Full-Stack web-developer because I wanted to be more than just a conscious consumer and become a maker of digital spaces. Combined with a background in classical music, I became hyper aware of the building blocks that make up communication. Similar to sight reading music, I am able to quickly adapt Ruby and Javascript frameworks as a result of attending the Flatiron School.

TECHNICAL PROJECTS

Floriography - Github Frontend | Github Backend | Heroku | Demo
React and Redux based social media environment that allows users to make bouquets based on the language of flowers.
+ Created a Rails API backend and seeded 100+ instances to associate flowers with their meanings and tones.
+ Generated bouquets by connecting to Florigraphy's API and Watson Tone Analyzer API and email them using ActionMailer.
+ Utilized Redux to manage the interactivity of React components and their designated event listeners.
+ Conceptualized a social media atmosphere including stylized posts, hover events, animations, and pop up modals using CSS and Sass.

La Bodega - Github Frontend | Github Backend
A React commerce application built to simulate a bodega shopping experience.
+ Constructed a Rails API backend that checked user requests for authorization using JavaScript Web Tokens.
+ Applied React state and local storage to persist a user's cart, items, and available balance.
+ Redirected unauthorized users to a login route by creating a higher order component.
+ Structured CSS stylesheets using Sass and displayed store items using React Semantics.

The Graveyard - Github | Heroku | Demo
An interactive forum platform used to create, find, and read scary stories.
+ Developed a Rails API backend used to interact with a JavaScript frontend.
+ Applied Object Oriented JS to handle asynchronous requests whenever a user interacted with a story.
+ Increased user engagement through event listeners and pop-up modals.
+ Designed a graveyard theme along with two experience modes using CSS, Bootstrap, Photoshop, and Anime.js.

TECHNICAL SKILLS

HTML5, CSS3, SASS, Ruby, Rails, JavaScript, React, REST, Redux, MVC, ActiveRecord, Object Oriented Programming, Illustrator
